

Hari Krishnan

Lead Full-Stack AI Engineer

vijayharish25@gmail.com | +91 9841944208 | github.com/HariKrish4 | linkedin.com/in/hari-krishnan-ab353067 | Chennai, India

PROFESSIONAL SUMMARY

Hands-on Lead Full-Stack AI Engineer with 13 years of experience architecting, designing, and shipping distributed backend and frontend systems across web, mobile, and AI service layers. Proven record of leading cross-functional teams of 10–15 engineers (comprising developers and QA) in fast-paced Agile environments. Expert in React, React Native, Node.js, Java, and Python, leveraging AI coding tools to accelerate cycles. Passionate about writing clean, maintainable code, coaching junior developers, profiling/optimizing code for peak performance, and translating user feedback and metrics into stable production services.

TECHNICAL SKILLS

Frontend & UI:	React, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, Vercel AI SDK, WebSockets, Reusable Component Architecture
Backend & Data:	Node.js (Express), Java (Spring Boot), Python (FastAPI, Django), RESTful APIs, MySQL, PostgreSQL, MongoDB, Redis, Distributed Systems
AI Frameworks:	Google ADK, LangChain, CrewAI, Vercel AI SDK, Antigravity, GitHub Copilot, Cursor, AI Coding Tools
DevOps & Tools:	Agile Software Development, CI/CD, Sonatype, SCA, AWS (S3, Lambda), Firebase, Performance Profiling (Heap Analysis, Chrome DevTools), System Monitoring (reliability metrics, production operations)

PROFESSIONAL EXPERIENCE

Specialist

Jan 2022 - Present

Fiserv — Chennai, India

- **Hands-on Architecture, Design & Coding:** Owned the end-to-end architecture, design, and development of frontend (React/Next.js) and backend (Node.js/Python) components for a conversational business intelligence platform where autonomous agents execute SQL queries across PostgreSQL, MongoDB, and Redis backends.
- **Team Leadership (Dev & QA):** Led a cross-functional Agile team of 14 engineers comprising developers and QA testers to deliver high-priority product features, establishing sprints, conducting planning sessions, and accelerating release velocity.
- **Direct Collaboration:** Worked directly with product managers, designers, architects, and developers to refine and ship features, ensuring they align with user requirements and core product specifications.
- **AI Integration & Tool-Calling:** Built a customer support agent copilot using tool-calling to fetch database records, check shipment statuses, and draft replies, reducing average response time by 50% via Google ADK and Antigravity.
- **Profiling & Memory Leak Resolution:** Proactively optimized client-side (React/React Native) and server-side codebases, analyzed heap snapshots to resolve memory leaks, monitored reliability metrics, and refactored monolithic services into modular, testable chunks to improve performance by 25%.
- **Operations & Stability:** Monitored, operated, and maintained production-level services to deliver 99.9% production stability, while coaching junior developers to write clean, maintainable, and highly secure code, reducing dependency vulnerabilities by 60% via Sonatype scans.

Software Engineer

Aug 2017 - Dec 2021

Nielsen — Chennai, India

- **Distributed Systems & RESTful APIs:** Developed Spring Boot microservices and RESTful APIs, reducing API response times by 30% and implementing caching structures using Redis to scale distributed systems.
- **Mobile Application Engineering:** Built and deployed cross-platform mobile applications (React Native) across 50+ countries, maintaining high crash-free session rates and stable releases.
- **Data Pipelines & Backends:** Automated time-series data processing integrated with MySQL, PostgreSQL, and AWS S3, reducing manual processing effort by 50% and improving reporting pipelines.
- **Profiling & Reporting:** Profiled backend systems and optimized Python-based batch processing pipelines, improving reporting efficiency by 35%.
- **Agile Team Participation:** Participated in daily Agile ceremonies, collaborated with product managers to iterate quickly based on product metrics, and awarded Star of the Month and Simply Excellent Award (2x).

Software Engineer

Dec 2015 - Jul 2017

Colan Infotech — Chennai, India

- **Full-Stack Development:** Engineered client and server features for eCommerce and appointment-booking applications using React, Node.js, and MySQL, improving user engagement by 30%.
- **Performance Tuning:** Profiled mobile and web client code, refactored bottlenecks into modular components, and reduced mobile app crash rates by 20%.

Junior Software Engineer

Sep 2014 - Dec 2015

Panamon Technologies — Chennai, India

- **Android & Frontend Engineering:** Developed native Android applications including eCommerce, tracking, and productivity tools, working within an Agile team structure.
- **Component Reuse & Modular Code:** Increased development efficiency by 25% by designing and building a reusable, modular component library.

Trainee

Dec 2013 - Aug 2014

MavinApps — Chennai, India

- **API Integration & Mobile:** Built Android applications integrating RESTful APIs, Google Maps, and Firebase Cloud Messaging.
- **Core Software Foundations:** Developed strong foundations in OOP, Data Structures, and scalable mobile systems, striving to write clean and maintainable code under senior guidance.

EDUCATION

Advanced Certification in Software Engineering (ACSE)

2021 - 2022

IIT Madras — Focus: Cloud, Blockchain, IoT

Bachelor of Engineering – Computer Science

2009 - 2013

T.J Institute of Technology, Chennai

CERTIFICATES

DeepLearning.AI

AI Python, Generative AI for everyone, Agentic AI
